Arthur Ashmore Dies Suddenly

The death of Arthur Ashmore son of Mr. and Mrs. Jas. Ashmore, which occurred at the Vulcan hospital on Saturday, Dec. 27th, after an illness of some two weeks duration, came as a real shock to the community, as until a short time before his demise, hopes had been entertained of his recovery. The deceased, who was in his nineteen year, was born and raised in the Champion district and was widely known among the young people of the community. He had been in the hospital since Dec. 15th, but his silent baffled medical skill, and days before his death his relatives were notified of his hopelessness of the case. This is the second death in this family during the year, Arthur having been predeceased by an older brother, Dennis, and the aged parents and other relatives have the sympathy of the community in their double bereavement.

The funeral took place on Sunday, Dec. 28th, the service being held in the Community Hall, Rev. P. Dawson officiating. There was a big attendance from all over the district, and the casket was covered in beautiful floral offerings. Besides his father and mother deceased leaves six brothers and one sister to mourn his loss—Robert, William, Henry and John of Fernie, B.C., James, Edward, Ernest and Lily, of Champion. The pallbearers were Harry Taylor, Joe McNaughton, Billie Bozarth, Wayne Chapman, Danie and Bruce Paley. Tributes of sympathy were received from the following: Cleverville Pioneer Club, Amity Club, Mr. and Mrs. Harry McNaughton, Mr. and Mrs. Noyes and family, Vulcan Ferguson Family and Victor and Ethel Ferguson, Ute Mtn. Mrs. F. W. Galloway and family, Mr. and Mrs. Ed. Carlson, Mr. and Mrs. Wm. McRae, Mr. and Mrs. Chal Matlock and family, Physio-Biotics and Dr. Farley, Mr. and Mrs. E. Siler, Mr. and Mrs. Jas. Ellis, Mrs. Carlson and family, Mr. and Mrs. Homer Howerton and family, Dellert and Franklin Cool, Mr. and Mrs. Tom Burland and Muriel, Mr. and Mrs. Newsome and family.

Should Use Best Seed Obtainable

The importance of using the best seed obtainable, seed from plants of good breeding and pedigree, was stressed by Dr. Seager Wheeler, five times world champion, during a public address recently in which he made reference to the preparation of exhibits more especially as applied to the World's Grain exhibition and conference at Regina in 1932.

Count Eight End In Curling Game

An eight end was counted in a game by P. Holm's curling rink, A. Baker being the opposing skip, last Friday night. This was a very unusual, though possible occurrence, and Mr. Baker is entitled to sympathy as he was leading at the time it happened and would likely have won his game but for the bad end.

The Christmas day service was well attended in the United church at 12 o'clock noon. Rev. Peter Dawson taking for his subject "The First Doxology."

Former Championite Wins Big Prize

Miss Irene M. Anderson, 17 year-old daughter of Mr. and Mrs. Frank Anderson, 830 Boulevard northwest, received a pleasant surprise on the evening of Christmas Day when she was informed that she had been the winner of \$1,000 cash in a contest staged by the Plymouth Motor Corporation. The contest was the best essay on "Why I Would Buy a Plymouth," and it had been advertised by radio and newspapers for several months.

Mrs. Anderson was born in Champion and lived here for some years prior to moving to Calgary with her parents.

W. Bretall Killed In Auto Accident

W. Bretall, a former employee of the Canadian Bank of Commerce here and at the time of his death accountant in the Coronation branch of the same bank, was killed in an automobile accident on Christmas day, the car he was driving taking to the ditch. Two companions escaped with minor injuries. Deceased had many friends here who will regret his untimely death.

Canadian Situation Better Than Most

With the contrast between conditions in Canada and those in other countries in mind, it is evident that employment is being maintained at relatively high levels. New industries are coming to Canada in large numbers and the number of enquiries received as to the possibilities for other new industries is unprecedented. Diversification in agriculture is making rapid progress. As the farmer becomes less dependent upon a single source of income, his revenue will be more stable. Our whole industrial activity has been maintained at a surprisingly high level. That Canada has come through a worldwide depression in so much better condition than have other countries is a comment on the strength of Canadian economy and finance. This is the best evidence that the return of normality in world affairs will herald the resumption of expansion in Canada.—Royal Bank Letter.

Birthday Party Enjoyable Affair

A very pleasant time was enjoyed by a number of boys at the home Mr. and Mrs. Wm Ulrich, Wednesday afternoon Dec. 24, the occasion being the 14th birthday of Arthur Ulrich. Games were played. A sumptuous turkey supper was served the guests, the young host cutting the birthday cake like a veteran. The young guests left early in the evening all well ELECTRIFIED.

Both Canada and the United States furnished a list of automobile accidents at Christmas time that could not be termed anything but startling. Is it possible people are more careless in their driving, or is it simply the increased number of cars in use?

Bennett Promises to West Indicate Many Measures For Relief of Agrarians

(The Albertan)

Outstanding promises made at Regina by Rt. Hon. R. B. Bennett as measures of relief for the Western farmer were:

A great private corporation with the most prominent concerns of the Dominion as shareholders will use its capital as a revolving loan fund from which money may be loaned to farmers to aid them in getting into mixed farming.

Federal aid will be given provincial governments to alleviate the suffering of farmers in the winter and provide them with best grade seed for sowing to wing wheat.

The Government may take over the liquidation of the 1930 crop.

Farmers guaranteed to buy at least between 7,000,000 to 9,500,000 bushels of the 1930 Canadian wheat crop.

The Canadian minister to Japan will discuss the sale of millions of bushels of Canadian wheat with Chinese authorities. The Government is prepared to provide credit facilities to China to open up this trade channel.

Pronise of grain rates on Hudson Bay Railway, when placed in operation, fixed on basis of Crow's Nest Pass rates.

Happy New Year

NOTES AND COMMENT.

A factor in the wheat situation which has received little attention is that per capita consumption is decreasing. This, in the United States amounted to 118,000,000 bushels last year. Undoubtedly the same thing is occurring in Canada to a certain extent, the facility with which other foods are acquired leading to the result. With European nations endeavoring to produce as much of their own wheat as possible, and decreasing consumption where the exportable surplus is largely known there would appear to be an insistent demand that wheat production be decreased in this country to the greatest possible extent for the coming year at least.

There might have been a day when a highly protective tariff would have permitted the nation imposing it to benefit at the expense of other nations, but with absurd tariffs being imposed in every direction and governments interfering with the natural course of trade by every possible means it appears very doubtful if there is any real possibility in tariffs any more. The Canadian people are advised to buy Canadian made goods with the idea that prosperity may be attained and unemployment banished. European nations are trying to grow wheat for their necessities because we do not buy from them. Isn't everyone likely to lose out in the deal the way things are going?

The Chronicle joins in the felicitations of the season. May it exceed your anticipations.

Pool Position Outlined

Replying to an address delivered by C. J. Yorath of Calgary, before the Rotary Club at Lethbridge on December 16th, R. D. Purdy, manager of the Alberta Wheat Pool says in part:

The Wheat Pool faced a problem of the gravest nature when it came to the marketing of the 1929 crop. Canada had a slight crop, the world crop had been reduced by half a million bushels. The enthusiasm of grain traders and speculators had pushed the Winnipeg market above world parity and even although the Pool offered wheat well below Winnipeg prices, sales in anything like the usual volume could not be effected.

The Pool, however, refused to step in and break the Winnipeg market, which action would assuredly have brought on a year ahead of its actual happening the present disastrous market conditions. Further, the Pool sought by every means in its power to maintain prices at a fair level, even going so far as to purchase 5,000,000 bushels of wheat for future delivery when the market sagged to dangerous levels.

It should be remembered that in other nations the governments took it upon themselves as a public duty and public necessity to sustain markets by every means in their power rather than have their agricultural population suffer. France, Italy, Germany, Spain and other countries pas-

sed legislation to fix wheat prices and made their populations pay. The United States government willingly provided half a billion dollars for the purpose. In Canada the onus of trying to save the farm population was left on the shoulders of the Wheat Pool. A few bankers and a few business men and newspapers recommended the course the Pool was taking until the depression continued despite the predictions of the so called best brains in the world, and when it became obvious that the burden was too heavy for the Pool, lukewarm friendliness changed to criticism, the volume of which has now reached a crescendo unparalleled in the business history of this or any other country.

Finally, the provincial governments came to the aid of the Pool and in doing so; instead of gaining the commendation of those whom it might have been expected would like to see the farming industry protected, only increased the wild criticism. The burden of wheat marketing during 1930-31 which has been shouldered by the governments of other countries has now fallen on Wheat Pool members, the bulk of whom are profitably shouldering the responsibility.

At the same time, those non Pool wheat producers who got a good price for their wheat last year and who did not lose money in buying further operations, should offer a prayer of thankfulness that the Pool did put up such a valiant fight last fall and winter. And the business and professional men should join in that prayer.

If the Pool helped the wheat market by buying 5,000,000 bushels of wheat for the future delivery, the cost of farmers and others who bought wheat consistently from \$1.50 per bushel down to 50 cents are also deserving of a measure of credit for helping to support the market and the bulk of their purchases must have exceeded Pool purchases many times over. While it is generally thought that purchases of wheat on margin were made to make money for the purchaser, the fact that they helped support the market, allowing others to get a good price for their wheat, should be more or less balm to the farmer from the mountains to Winnipeg who sunk their money in margins during the year. Even the Pool should thank them for their help.

A Happy New Year

A New Era Of Co-operation Between Canada And U. S. In Air Service Development

A new era of co-operation between Canada and the United States in the development of our services began when plans for the inauguration of new air routes were made. These were announced at Ottawa. The announcement came following a conference between P. T. Coolican, assistant deputy postmaster-general of Canada and W. Irving Glover, assistant postmaster-general of the United States.

If the decisions reached by the two postal officials are approved by their respective governments, Canada will have a regular air service from coast to coast and up to important points with the transcontinental air lines of the United States. In addition a north and south line from Alaska to Florida is contemplated.

The setting up of trans-Atlantic air services has been discussed, but on the point the programmes of the two countries are quite distinct. Canada will effect a saving of 48 hours in the present steamship service by ship to steer a direct route from the United States to assume an air route to Europe from New York via Bermuda, the Azores, Lisbon, Portugal and through France to England.

The first link in an air line which will run the entire length and width of North America from Miami, Florida, to Alaska, will be inaugurated shortly. It will run from Calgary to Miami and it will be possible to travel between the two points in 42 hours, a saving of 60 hours over present methods of communication.

Eventually it is hoped to extend this route from Calgary north and eastward into Alaska by way of Fort McMurray and thence into Asia.

The first step in the scheme has been taken with the definite decision to put into effect an aerial link between Winnipeg and St. Paul-Minneapolis.

The details of the Winnipeg-St. Paul schedule were being worked out the officials were also discussing the more ambitious scheme to develop a route from Calgary, through Fort McMurray into Alaska, and thence across the continent to Asia. It, unless Canada and the United States joined in the development of the Asiatic route, might never see success in construction, financing in that regard. Russia is making considerable strides in aviation. Mr. Glover said, and 22,000 miles of flying is being done in that country daily.

Three years are regarded by the officials as sufficient time to bring the Asiatic service into being. In the meantime definite progress is being made. Mr. Coolican said, to set up aerial communication between Calgary and Vancouver. The route through the Rockies was not, he said, regarded as particularly difficult. As soon as communication is established to the coast by air, links between Canada and the United States would be made at Lethbridge, Alta., and Vancouver. The Lethbridge link will be to Great Falls, Montana, while the western extremity of the United States system will be contested at least from Vancouver.

The flights arranged between Winnipeg and St. Paul will complete the aerial chain between the prairies and the east. Many of the Canadian cities will be carried over United States air lines to Detroit and will thus re-enter Canadian territory. While the schedule has not been definitely settled, Mr. Coolican said, that mail from Calgary will be carried by air in 40 hours, a saving of three days. A saving of 40 hours would be effected in mail for Toronto.

A glass factory in Alton, Ill., produces 300 tons of bottles a day, in more than 3,200 sizes and styles.

It is in a beige and brown mixture with a few red threads for stripes. The stockings are made of tweeds having a dash of yellow and orange among the browns. There are four patterns, each of which is so whatever you're coloring may be suited.

The hose can be opened all down the front if you wish or can merely have the elastic seizure effect. A tiny button holds the hose closed and at wrists form a fresh modish trim.

This pattern may be obtained in sizes 14 to 20 and 24 to 40. It is ready for immediate delivery. It is highly popular.

Send 25 cents (stamps or coin) to Fashion Bureau. Write card giving plain name and tell and add dress the number of the pattern and size you want.

This Complex Life

Man With All His Ingenuity, Cannot Solve Economic Problems

Man can take a drop of blood and tell the story of the owner's death without touching the ground; man can weigh the stars of Heaven; man can drag oil from the bowels of the earth; man can compel an icy water to cook his meal; man can turn a million dollars into a dollar in an hour; man can breed the seeds out of oranges; man can coax the sun to lay three hundred and sixty-five eggs in a year; man can persuade deer to drink pipes and other bones to play guitars. Man, in other words, is quite an ingenious and remarkable package of physical and mental machinery.

Man, however, is confronted with one problem, he retires, defeated, to his hut. Show him six men with out money, and six loaves of bread, and he will eat them up, but if it be, but who wants more? Show him how the six hungry men can be put in possession of the six surplus loaves, and watch them then eat up the six men, and then attend meetings and holds elections, and makes speeches and cries out that a crisis is upon him, and does a lot of useless talking, and then retires defeated, to his hut, to live in the shivering twilight the tableau of the six hungry men and the six unapproachable loaves.—The Western Producer.

Canadian Farm Loan Board

About Seven Million Dollars Disbursed To Farmers In Six Provinces

At the end of the present fiscal year, March 31st next, following nearly two years, the Canadian Farm Loan Board will have disbursed nearly \$7,000,000 in loans to farmers, principally to grain farmers, according to Dr. J. D. McLean, chairman of the Board. Up to the present the average loan has been a little over \$2,000 and it is pointed out, by Dr. McLean that back the last two months of the year, September, October, November and December, the Government had curtailed in the form of lands and buildings values of

Less Wheat In Britain
The British ministry of agriculture reports that England's wheat production for 1930 was 21,404,000 hundred-weight, which is 4,000,000 hundred-weight or 18½ per cent less than last year's crop. Virtually no grain production was shown to be under last year's figures with barley dropping 26 per cent and oats 12.

Hints To Migrants

Gerald Nettleton, twenty-year-old Toronto aviator, jumped 10,000 feet when the weather on high became too "soupy" that he couldn't see ten feet ahead. He found a place of safety and recommended to the car consideration of motorists who keep on driving when they can't look through their windshields.

Western Canada Turkey Show

The first Western Canada, B.C. Turkey Show, held at Vancouver, B.C., the other day, was a marked success, there being several hundred people present.

Fertilizer Plant

Good progress is being made in connection with the fertilizer plant of the Consolidated Mining and Smelting Corporation Ltd., at Warfield, B.C. Some of the buildings are now nearly completed and in one or two cases, machinery is already being installed.

Eskimo Maid Is Crowned Beauty Of Arctic Circle

Eskimosak, 24-year-old blonde, Alberta, and the interior of British Columbia, were the most representative ranching units for the year 1929 and 14 for the current year.

Real work of the survey was secured by observation and contact in the field and preparing conclusions therefrom—will now start and it will take two or three months to carry out the phases.

From Baker Lake, little a thousand miles north of Winnipeg, came word of Eskimosak's triumph. "She's a real beauty," said her mother, Mrs. Eskimosak, "and I'm proud for the first time in her life, she can survey her price-winning features. A mirror was her reward, the first she has ever owned.

Miss Eskimosak, who organized the contest, said Eskimosak, the most beautiful Eskimo lady she has ever seen. She lives not far from Baker Lake. Photo Canadian National Railways.

Place Order For Equipment

C.P.R. Lets Contracts For Both Passenger and Freight Cars

Orders have been placed by the Canadian Pacific Railway for the manufacture of 100 passenger cars and 425 freight and service units, it was announced at Montreal.

The Canadian Car and Foundry Company will build ten baggage and express cars and the Steel Car Company will build 250 refrigerator cars, of which will be finished in the company's Angus shops.

Forty-five gondolas and 35 air-draught cars will be supplied by the Canadian Car and Foundry Company, while 250 refrigerator cars will be constructed by the National Steel Car Company and 45 flat cars by the British Car Company.

In addition to the above, three snow-plows and 25 tank cars will be constructed by the company in its own shops.

Spoke From Experience

The cheap-jack auctioneer was trying hard to sell his stock of cigars.

"You can't get better, gente," he bellowed; "twenty-five in a box!"

You can't get better, I don't care how much you pay."

Suddenly a voice put in from back of the crowd:

"He's right, folk," it said. "I had one last week, and I'm not better yet."

Atkins Unbelievable Heat

The Westinghouse laboratories recently obtained a temperature of nearly 1,000,000 degrees.

This is created in a special type of vacuum tube. A small spot on one of the metallic electrodes between which an electric arc had been struck, reached this temperature, which is 165 times hotter than the surface of the sun.

British Columbia Tomatoes

Twenty-three thousand dollars,

representing the value of a year's tomato crop in the Okanagan section of British Columbia, were distributed to growers by the Dominion Canners Limited. The average production was 7½ tons to the acre, for which the growers received \$1.75 per ton.

OAK BAY GOLF COURSE

The Oak Bay golf course on the sunbathed southern tip of Vancouver Island, which will become the center of interest for western Canadian golf fans when the annual Empress Mid-winter Golf Tournament for the E. W. Beatty Trophy takes place February 23-28 inclusive. Offices breeze, rock hazards and tricky mäsé shots tend to make this course beside the Straits, one of the sportiest in Canada. It is the home of Lorne Shantz, a 3 handicap man, last year's winner of the Beatty Trophy, playing over the Colwood Course, and who this year will defend his title under vastly different conditions.

Estimated Age Of The Earth Is Advanced From Time To Time As Scientific Knowledge Increases

Complete Sheep Survey

Economic Survey Of Sheep Ranching Industry Of Western Canada

Return to Ottawa Lawrence E.

Ridge, of the Department of Agriculture

marks completion of the field work

in the economic survey of the sheep

ranching industry in Western Can-

ada which is being carried out in

cooperation with the experimental

farms branch.

Mr. Kindt has visited ranches in

southwestern Saskatchewan, Al-

berta and the interior of British Co-

munity. Complete results were ob-

tained from 160 representa-

tive ranching outfits for the year 1929

and 14 for the current year.

Real work of the survey was secured

by observation and contact in the

field and preparing conclusions there-

from—will now start and it will take

two or three months to carry out the

phases.

When this venerable sphere

has been growing at a shocking

rate ever since geology became a

science in 1860, John Phillips

estimated the age of the planet at

56,000,000 to 96,000,000 years.

Twenty years ago his highest figure had

been considerably enlarged by geolo-

gists.

But the end was not yet.

Radioactive disintegration and

radioactive elements break up

at a definite rate that is measurable.

Physicists observed the rate of

disintegration and multiplied the previous esti-

mate.

When this venerable sphere

was estimated at no less than

500,000,000 years, Prof. Louis

V. Theriot remarked: "Truly there

is no end to the increasing richness of

knowledge."

But this did not satisfy science

from inflicting further penalty upon

Mother Earth.

The latest estimate of time since

the formation of the earth from

the sun is 2,000,000,000 years.

This figure used by astronomers is

now substantiated by Prof. Alois F.

Kovarik, of the Yale physics depart-

ment.

Prof. Kovarik's measure-

ment of the natural disintegra-

tion of radioactive elements in a piece

of uranium indicates an age of

1,820,000,000 years.

Many geological "time clocks"

have been used to estimate the

age of the earth. The most famous

is the rock strata that are exposed in

such gorges as the Grand Canyon of the Colorado.

The degree of evolution in

one of these strata furnishes

evidence. But the sequence of rock

formation is frequently broken,

and it is impossible to determine

how much time has elapsed be-

tween the formation of successive

layers.

Geology postulates that

most of the earth's surface has been

under the sea a number of times,

and it is possible that some millions of years could elapse from one inundation to another.

For measurement of recent time the rate of erosion is useful. For

example, the rate of erosion of the

United States is being lowered at

the rate of one foot in about 7,500

years. On this basis it is estimated

that 15,000,000 years would be re-

quired to reduce the continental

sea level to erosion if the up-tilts

made by mountains are made

to stand still.

The layman is not much interested

in these measurements by which he

works, but he may find some comfort

in the fact that the earth is not a

recent concretion, and that its pre-

historic forms probably could be

modified and made to stand still.

No one knows how long life has been

on the earth, but, of course, the life

of man is only an infinitesimal span

compared with the length of time

since this sphere began to spin.

The important thing seems to be

that man, now that he is here, is

determined to stick with the old globe

as long as it continues spinning. —

Washington Post.

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pains. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to let aches and pains? It may be only a simple headache, or it may be neuralgia or neuritis. Rheumatism. Lumbar. Aspirin is still the sensible thing to take. There is hardly an ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

always to be relied on for breaking up a headache.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.

Wheat.

Wheat, at the present time, bulks larger in the eyes of the people of Canada than ever before in its history. The word "wheat" is on everybody's tongue; it is the outstanding subject discussed by railway executives, bank presidents in their annual statements, manufacturers, wholesalers, statesmen and politicians great and small. If never before the Canadian people have now awakened to the fact that wheat is the most powerful factor in the financial life of this Dominion.

Indeed, it is the country's very life blood upon which the flow of its prosperity, if indeed, not its present existence depends.

The industries of Eastern Canada languish because western agriculture is in difficulty, severe difficulty. The east is beginning to remember, what perhaps it has forgotten, that in years past, when the eastern prairies were growing in population and wealth, while the factories were busy and working overtime, when new industries were being established and large additions to plant made to existing ones, were the years in which western Canada was prosperous.

It was the enormous new and increasing purchasing power of the west that made eastern industry hum.

What has happened when wheat is taken at a price that will even cover the costs of production, not to mention any profit to the producer, the whole country

cause this is a remarkable way, but I continue, it must change. What has happened to Canadian wheat when the market, a drug on the world's markets, which it is believed to be at a price that will even cover the costs of production, not to mention any profit to the producer, the whole country

retains its pre-eminent quality, it remains the finest wheat in the world, and because this is so the present situation is all the more tragic. The outstanding wheat-growing pre-eminence of western Canada's wheat was again demonstrated this year when once again the world's championship was by an Alberta farmer.

It is twenty years since the wheat championship competition was inaugurated, and during those twenty years the three prairie provinces of Canada have carried off the championship no less than seventeen times. Saskatchewan winning it ten times, Alberta five times, and Manitoba once. In the other four years the honor went to one individual state across the border - Montana.

This is a wonderful record for western Canada. It speaks volumes not only for our wheat, but for the future of our country, but for the enterprise of our farmers, their patriotic spirit, and their family. But the fact remains that the industry of agriculture in western Canada is on a solid and enduring foundation; it is the superstructure involved in production, distribution costs, transportation costs, marketing difficulties, general world conditions of over-production and loss of purchasing power wherein the trouble of today lies. Those things can, must, and ultimately will be rectified.

And Now Codfish Shoes
Shoes made of codfish skin, tanned like leather, are to be part of women's wardrobe this winter. A company in Lynn, Mass., has started work on samples, and expects the shoe market to meet the demand for the cold, with its eyes and gills, fins and tail, as well as the scaly markings. The linings are of deep blue suggesting the ocean, and the laces are like fish lines, the ends being tipped with putty knobs.

"Let us wait until the torchlight procession has passed." —Der Lustige Sachse, Leipzig

Hints To Grain Exhibitors

Advice In Respect To Entries At World's Grain Exhibitions

Hints given to prospective grain exhibitors at the World's Grain Exhibition and Conference at Regina in 1932 by Cecil Tice, secretary of the British Columbia Wheat Growers, include the following: (1) Exhibits must reach Regina on or before March 1, 1932; (2) Transportation charges must be prepaid; (3) All exhibits must bear the name of the variety. This is often omitted at fairs, causing needless confusion among buyers; (4) Only one entry may be made in any one class, although exhibitors may enter in as many classes as desired; (5) Exhibits may be taken from any year's crop.

Planning Long Line

One of the longest air lines in the world, linking Berlin and Tokyo, is in a possibility, according to reports reaching here from the Japanese Aviation Bureau of the Ministry of Communications. The proposed route would be operated from Tokyo to Hong Kong by the Japanese, over India by England, and the rest of the way by Germany.

Prof. Albert Einstein, famous German scientist who is visiting this continent, is seen above with his daughter, Margot, immediately following her marriage to Dimitri Marianoff, Russian scientist and author, in Berlin.

Fastest Warship Launched

Nothing Can Outdistane Destroyer Built By British Navy

The New York Times publishes the following special cable from London:

What is believed to be the fastest ship in the world has just completed her trials for the British navy, reaching a speed of 40 knots an hour, without pressing her machinery in any way.

The 10,000-ton destroyer *Fistula*, sister of *Codrington*, 1,520 tons, completed last June at the Swan and Hunter shipyard in Glasgow.

In the other navies have been produced to out-distance this British whippet, which with a full crew in three and a half days of top speed could be maintained.

Approve Federal Plan

Alberta Horse Breeders' Association Endorse Policy For Assistance

Alberta Members

Approval of plans announced by the federal minister of agriculture for advancement of the livestock industry by assisted distribution of pure-bred stock, was voted in resolution passed at the Alberta Provincial Horse Breeders' Association in annual convention at Edmonton. The proposal to purchase several of the best sires of draft breeds and the reversal of the loan-leasing policy were specifically considered and were also extended to the thoroughbred horse breeding plan.

Strangled With Asthma, is the only expression that seems to cover it. The disease is endured from an attack of asthma, which is often brought on from a cold. Kellogg's asthma remedy is a good measure. Where all suffocation breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

National Park On Georgian Bay

Proposed park, part of an Indian reserve in Georgian Bay, has been purchased by the Department of the Interior, for National Park purposes. Announcement to this effect was made by Sir George Perley, acting minister prime. The sale price is fixed by appraisers.

"But, sir, there is no cause for complaint. The best people stay at this hotel."

"Well, I am used to different hotels."

"Yes, sir, but I didn't think you wanted anybody to know." —File Blaister, Munich.

FAMOUS GERMAN SCIENTIST

Radios In Canada

Popularity Of Radio Is Increasing According To Federal License Bureau

The radio is becoming increasingly popular in Canada. In the first eight months of the fiscal year more licenses were taken out than in the preceding year.

The figures were: 1930—800,000; 1929—1,241,146 licenses.

There are still four months to go and officials of the radio department believe licenses may reach 1,600,000 in the next year.

Popularity shows a greater increase than either of the other two Prairie Provinces.

These figures were taken in August against 26,419 last year. In Saskatchewan the figures for this year are 25,921, against 32,951 last year; in Manitoba, 25,000, against 21,474.

Winnipeg records the greatest advance among the cities with 16,933 licensed so far this year, against 15,084 last year. The figures for Regina are 3,144, against 3,032; Saskatoon, 2,076, against 1,889; Moose Jaw, 1,865, against 1,072.

Discounts Russian Menace

Canadian Investigator Says He Encounters Some Anti-Soviet

Entomologists and biologists are the characteristic features of the Russian people in the economic and social experiments they are making, says Dr. A. G. Lockhead, agricultural bacteriologist of the Canadian Government Experimental Farm at Ottawa, who is making a visit to the Soviet Republic.

"The Russians firmly believed what they are aiming at will give the greatest good to the greatest number," he affirmed. "They believe that the best way to live is necessarily to follow their methods."

Mr. Lockhead was Canadian delegate to the second international conference on soil science at Leningrad and Moscow, and a member of scientific research appears to be encouraged in the Soviet, he says.

The recent unloading by Russia of wheat, lumber and coal on world markets has been based on a short-term credit, rather than a deliberate part of a market-breaking scheme, Dr. Lockhead opines. In this connection, he believes the menace from the U.S.S.R. is not a present serious.

Keep Douglas' Egyptian Liniment handy. A sure speedy remedy for sprains, strains, rheumatism, sciatica, corns, warts, sore feet. Invaluable for inflammation and muscular rheumatism.

Where Women Predominate

In Europe there are 18 million more women than men, according to "Statistical calculations." France has 3,000,000 more women than men, France 2,000,000, and Russia 4,000,000. Portugal is declared to be a land where women form the highest proportion of the population.

Big Apple supplement

The largest apple shipment yet forwarded from Nova Scotia to the European continent on its way, consisting of 18,000 barrels destined for Antwerp, Belgium.

Tie Of Empire

Ideal Has Never Been Stronger In the Hearts Of People

"It is unfortunate we should lose Canada and if the Dominion had her there would be little danger," declared Sir William Crawford, president of the Publicity club of London, England, which discusses the question, "What shall we do Canada?"

"At all times in the history of our country," said Sir William, "has our ideal of empire been stronger in the hearts of our people."

The speech was addressed by P. W. Field, his ministry's senior trade commissioner in Canada and Newfoundland. Mr. Field said British exporters must expect increasing competition from America, in many industries, and he showed that the United States exercised a great influence over the Canadian market. The Americans had established a thousand factories in the Dominion and in a number of cases the American competition, only the most efficient business methods by British firms would enable Britain to remain in the field.

Mr. Field agreed that Canadian tariff changes which had come into operation since May would, undoubtedly, limit British business, but he believed it was still possible to obtain a large share of Canada's import trade by strengthening and revising methods.

Restoration Of Chinese Credit

This Would Have A Most Favorable Effect On The Chinese Market

Restitution of Chinese credit would have a decidedly favorable effect on the wheat market, J. I. McFarland, general manager of the Central Selling Agency of the Canadian Wheat Board, stated in Ottawa.

Mr. McFarland was returning to the British Government after entering into discussions looking toward re-establishment of credit in China.

Price of wheat has dropped in the price of silver, Mr. McFarland said, China had become a large importer of Canadian grain.

Milner's Worm Powders will drive worms from the system without injury to the child. The powders are safe for children and adults. Each stomach capsule contains half a grain of worm. Milner's worm powder is a safe remedy for worms.

There are still four months to go and officials are optimistic that the new scheme will be successful.

Early reports asserted that at least 80 persons were killed as a great wave of white hot lava flows down the slopes.

Those who died were working in the fields and were surprised by the rapidity of the flow, hence had no time to escape.

Export Of Apples

Four steamers loaded 82,787 barrels of apples at the port of Vancouver for British and Continental markets during the week ended November 30th, bringing the exports for the year to 500,551 barrels. The latter total compares with 508,182 barrels for the corresponding period of last year.

Cotton picking in Argentine this season is expected to start February 15.

Spinach moss is really a member of the pineapple family of flowering plants.

BUCKLEY'S MIXTURE

Famous Sheep Farmer Leaves For England

William Darnborough Has Been In Saskatchewan Twenty-Six Years

Famous throughout the American continent as one of the leading farmers and ranchers, and renowned for his many victories in the grain classes at Toronto Royal and Chicago International shows, William Darnborough, of Laura, Saskatchewan, has sold his farm and left for his old home in Yorkshire, England. Mr. Darnborough will return, however, for the World's Grain Show to be held in Regina in 1932.

Mr. Darnborough has been a resident of Saskatchewan in 1904 without any knowledge of farming. Mr. Darnborough quickly established a farm second to none in the district and he attained great success as a sheep breeder. Since the war he has won an unknown string of successes with his sheep and grain at the biggest shows on the continent.

Albert Robbins, another prominent Laura farmer, has taken over the Darnborough holdings.

Volcanic Eruption In Java

Between 300 and 400 Persons Reported Ed To Have Perished

A Russian scientist despatched to the Java volcano asserted that between 300 and 400 persons were killed in the eruption of Merapi volcano in Java last week.

Ashes and lava shot out from the crater after the mud volcano had been erupting for nearly a month, and early reports asserted that at least 80 persons were killed as a great wave of white hot lava flows down the slopes.

Those who died were working in the fields and were surprised by the rapidity of the flow, hence had no time to escape.

Java is an inspiring sight, for huge columns of smoke belched up from the crater and vivid flames flashed out like lightning from time to time.

Forests and villages in the sleeping valley of lava and many villages were evacuated.

Praise For Sir Arthur Currie

"No words can express the gratitude of the people of Canada to Sir Arthur Currie and his colleagues for their kindness to members of the British Legion and their families when they arrived as settlers in Canada," said the Rev. C. H. H. East, president of the British Legion, when he spoke at a luncheon given Sir Arthur Currie by the Empire Service League in London, England.

Cut Down Food Wastage

...by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them *fresh* until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton packs in sheet form for less exacting uses. At grocers, druggists, stationers.

CHAPTER VII.—Continued.

Later, as they walked back to Elm Street, Nick pushing the go-cart, and Simeon riding in the umbrella, Nick said: "I wish you'd take Gay home with you, Uncle Sim. She isn't herself. I can't help feeling worried. The other night—" He paused for a moment, while the old man watched him from his high-backed chair—"she got upset by me. Well, our next door neighbor was singing. I suppose the music stirred Gay up. It was rather that sort, and she was feeling particularly bad. And we were inside—she cried. I thought it wasn't a good stop. I was scared blue. Didn't seem quite natural for a mere song to upset her as much as that."

"Did it upset you, boy?" questioned Simeon, his eyes still on Nick's face.

Nick laughed, a short, nervous laugh, and answered: "Well, perhaps it did—a little. I was feeling restless anyhow. It had been a hot day, and the apple blossoms smelled so sweet and—"

"You got pinin' for that broad highway you used to talk about?" queried the old man.

A guilty smile hovered on Nick's lips.

"Only for a few minutes, sir. It's not often I think about it these days; but that night—"

"Ah-m," murmured Simeon. "Your wife knows pretty well, don't she?"

Nick raised surprised eyes.

"Why, of course. Who should know me? I'm not a secret agent."

"No, no, no fur's I know. But ain't it possible that she wasn't so much upset by the music, as she was by knowin' that the music had upset you?"

Nick stood stock still.

"Why—it never occurred to me," he said.

"Well, if you was to ask my advice, I'd say maybe you better think about that. You can'tain't every man's got a wife like Gay."

"I'll go you another better there, Uncle Sim," said Nick heartily. "I'm the only man in the world with a wife like Gay. The Lord never made a dozen more perfect women. I've known it for some time. Since James Maxwell married and left town Gay's been lonely. I'd hope our new neighbors would supply the want, but, well, I hardly don't seem to hit off with 'em."

"What's all Mrs. Halliday?" asked Uncle Sim; and Nick laughed at the old man's assumption that the fault couldn't possibly be Gay's.

"Nothing, that I can see. It was taken away from me at the bank when you came in a pretty little woman in a blue gown. She always wears blue—says it matches her eyes. Pretty eyes, too—trusting, innocent variety. Gay says they're too innocent, but, then she doesn't see the woman justice."

"She got any mister?" asked the old man suddenly.

"Yes—a cynical author about twice her age."

"Maybe those innocent blue eyes is what made him cynical," chuckled Simeon. "Seems like I've heard o' such things sometimes havin' effect. Well, here we be. You set us to work, and as far as I can see, we can find, Nick, and I'll see to it. I b'lieve I'm hungry. Didn't have time for no proper breakfast before I started."

During the meal that followed (and despite Uncle Sim's warning, Gay had a batch of the corn muffins she

knew he liked), the question of the visit to State Line was broached again.

"You've got to go, dear," said Nick firmly. "It'll do you a world of good, and I'll come for Sundays. It will be a wonderful excuse for me to get away from home."

"Will you come this Sunday?" asked Gay wistfully. She felt suddenly homesick at leaving him.

"It's Thursday now, my dear," Nick said, smiling. "But you can get off till tomorrow. I'll give you a week of freedom from my company. And you needn't worry about me, Gay. I told Mrs. Halliday I was sending you away, and she suggested my going to the United States to travel for a while."

"That's right," she said. "Better keep gone while the goin's good," and opening his huge umbrella he considerably turned his back.

(To Be Continued.)

Wealth Of British People

Figures Show Over Ninety Billion All Saved Since War

Sir John Simon, who was president of the Royal Statistical Society of Great Britain, and who is also a recognized authority on national finance, has given his estimate of the wealth of the British people. He sets it down as follows:

"In 1914, the total savings of the nation for five years on war, sold over one-quarter of its original investments, and has saved since the war at the rate of \$2,375,000,000 per

year. This indicates two things in particular—extensive economic potentialities and a substantial recovery of strength since the war ended.

Of course, the total savings of the post-war period must be set

the loss of the war period, when nearly all capital was being made

and was being wasted.

"The resistance of metals to the passage of electric currents can be reduced only 5 per cent. It would be of colossal importance to electrical corporations. Dr. Kapitza believes it is possible to solve the problem of the resistance of metals to electricity and the future conduct electricity great distances without present day losses."

Preliminary arrangements have been made to install a liquid helium plant when Dr. Kapitza requires still lower temperatures.

Important Discovery By Russian Professor

Experts To Make Transmission Of Electricity Safe

Backed by the Royal Society and the British Government with money and all the appliances he needs, a Russian professor, Dr. Peter Kapitza, is carrying on work at Cambridge University to find a way to transmit electrical currents that will simplify and cheapen the transmission of current through thousands of miles of submarine cables ("bird's tails") and the vast net work of wires supplying power and light to factories and homes.

Dr. Kapitza is carrying out experiments of an almost fantastic magnitude. Among them is the damping of giant waves of electricity through miles frozen so cold that a special plant for the production of liquid hydrogen has been built so as to produce temperatures of 90°.22°. The temperature of the temperatures used, would make a polar blizzard seem only a trifle colder than a midsummer's day.

If the resistance of metals to the passage of electric currents can be reduced only 5 per cent, it would be of colossal importance to electrical corporations. Dr. Kapitza believes it is possible to solve the problem of the resistance of metals to electricity and the future conduct electricity great distances without present day losses."

In a somewhat different application it is also hoped that in the future that new portable ear may be made and an advanced fault-finder for airplane motors and propellers," said Foltz.

Electric Ear Detects Noise

Invention Will Be Invaluable In Eliminating Troubles On Machinery

An ear, with which it is hoped one hope to hear another ear, setting one sound to reduce another, such a sound waves to interfere. A big obstacle has been the human ear's inability to separate complex noises sufficiently for engineers to find out which one to get rid of the other.

The invention, it is announced promises to overcome this handicap. Weighing 60 pounds, the size of a suitcase, it consists of attaching to a single ear a number of small electrical devices that will amplify and cheapen the transmission of current through thousands of miles of submarine cables ("bird's tails") and the vast net work of wires supplying power and light to factories and homes.

Dr. Kapitza is carrying out experiments of an almost fantastic magnitude. Among them is the damping of giant waves of electricity through miles frozen so cold that a special plant for the production of liquid hydrogen has been built so as to produce temperatures of 90°.22°. The temperature of the temperatures used, would make a polar blizzard seem only a trifle colder than a midsummer's day.

If the resistance of metals to the passage of electric currents can be reduced only 5 per cent, it would be of colossal importance to electrical corporations. Dr. Kapitza believes it is possible to solve the problem of the resistance of metals to electricity and the future conduct electricity great distances without present day losses."

In a somewhat different application it is also hoped that in the future that new portable ear may be made and an advanced fault-finder for airplane motors and propellers," said Foltz.

There Should Be No Ugly Women!

There are 2 classes of women,

(1) The good, healthy and attractive creatures.

(2) Those pitiful ones who don't know their vital importance of Kruken Salts to the human body.

Kruken Salts are a perfect blend of the six vital minerals which Nature originally intended for the body organs should daily receive from food if they're to function properly and which is impossible to obtain in this age of modern cooking.

Get a bottle of Kruken Salts before the bottle is full empty your complexion should be gloriously smooth and free from all sorts of harmful acids and poisonous waste matter which cause blisters, blackheads and acne.

One bottle of Kruken Salts will furnish enough energy to give you a new lease of life.

Take a spoonful of Kruken Salts every morning and you will feel a keen and alert—no more weariness after getting up in the morning.

Little Helps For This Week

Recipes For This Week

(By Betty Barclay)

CHOCOLATE BREAD PUDDING

1 package chocolate flavored junket.

2 slices whole wheat bread — ½

Butter, thick.

1 pint milk.

Raisins.

Remove crusts from bread, divide lightly and cut in small cubes. Divide bread bread among 4 dessert spoons and add a few seeds each.

Prepare jello according to directions on package. Pour it over each bread. Let stand in warm room until firm—about 10 minutes. Then chill.

"Wail worthy of God, who hath called you unto His Kingdom and glory."—Thessalonians ii. 12.

Or that my being was an accident which fate, in working its sublime intentions, had not intended.

Not wished to be, to hinder would not design.

Earth drop uncounted in a storm of rain.

Had its own mission, and is duly sent.

To its own leaf or blade.

Even from a corner it is possible to spring up into heaven. Rise, therefore, and form thyself into a fashion worthy of God; thou canst not do this, however, with gold and silver. An image like to God cannot be formed out of such materials as these—Seneca.

Remarkable Stars

Continuously Shooting Off Matter In All Directions

The most puzzling case of stars in the sky is that known as the Wolf-Rayet, so named because their peculiar character was discovered by the astronomers Wolf and Rayet at the Paris observatory in 1868. Observations carried out over a number of years by the Dominion Astrophysical Observatory, Victoria, B.C., have in part elucidated the mystery. These stars are continually shooting out matter in all directions into space.

From the center of the jellied sun, a stream of atoms travelling outward from the star erupts over every part of the surface, some of the atoms reaching the terrific speed of 1,000 miles a second.

Surrounding the star is a luminous halo.

François Balin is a sliver-gray fragment.

Adds a charming refinement to the most finished appearance. Creates artful presentations of our

hands and fingers, and whitens the hands. Cools and refreshes, irritation caused by weather conditions, leaving never a vestige of stickiness, pleasant toilet requires for elegance and distinction.

"Hard times," repeated the dressmaker when the order was caned, "but we're bound to expand, must not make the improvements I had planned in the place?"

"Hard times, eh?" said the builder when the dressmaker was discussing the building plans. "Then I cannot afford a second bottle because hard times are coming and we must economize," explained the artist.

"Hard times," said the landowner, "but we'll wait not order the silk dress we can afford."

"Hard times," repeated the dressmaker when the order was caned, "but we're bound to expand, must not make the improvements I had planned in the place?"

WORLD HAPPENINGS
BRIEFLY TOLD

E. C. Merville, secretary to the government-general of Canada, will proceed to India with Lord Willingdon to his new post.

World-wide production of armaments has been suspended under the terms of the Treaty of Versailles has been urged by the Carnegie endowment for International peace.

A recent month automobiles registered in England numbered 27,846, an increase of 725 over the corresponding month of the previous year.

A man beat a horse in a 15,000 meter race at Temuco, Chile. The victor was Felix Saavedra, a Chilean Indian. He led the horses by 100 meters at the finish.

Dr. Arthur Torrance, of London, Secretary of the Royal Society of Great Britain, has announced plans for an expedition in February to Africa, in which he said he hoped to determine the origin of the race.

On January 1st, 1920, it shows that the majority of the 320 planes attached to the Port of London, England, had net average incomes approaching, or more than, \$1,000 during 1919.

Major Werner Bruckhardt, with a European assistant, fell into the crater of the volcano Merapi in Sumatra at the moment that it became suddenly eruptive, and perished in the boiling lava.

Michael Flinnerty, 104 years of age, died at Victoria, B.C., December 20. He was one of British Columbia's pioneers, having resided in the province for 67 years, the greater part of which was spent on Vancouver Island.

Twenty-six thousand one-pound cans of salmon packed salmons were donated to Seattle's needy citizens as a general relief program was launched there to aid the destitute and unemployed. The salmon—13 tons of it—was donated by salmon packers and distributed by welfare organizations and institutions.

You Never Can Tell

No Matter How Badly You Feel You May Be Able To Fool the Doctors

The death has taken place of William Johnson, aged 80, who entered the service of the age of 80, who retired from the Indian civil service in 1870, on the advice of his doctor, that his health would not stand the strain of serious work.

There is a solicitor named James Underhill, of Wolverhampton, England, now in his 98th year, who, seventy-five years ago, was refused admission to the church. Mr. Underhill now, despite his age of 93, played the flute in public at the surviving attack of pneumonia the same year, broke a leg and made a good recovery at the age of 94, and up to the present year has had his health sometimes failing during attacks at the rate of one hundred an hour.

A layman has to place reliance on what his doctor tells him. But these cases just show that even if that worthy youth have one foot in the grave, there may be a few good kicks left in you yet.

Berlin-Moscow Air Service

The Berlin-Moscow and Berlin-Leningrad air mail services of the Central Government until next spring. During their operation 2,860 passengers were carried, 27,145 kilos of mail and 60,000 kilos of freight, an increase over the previous year of 12 per cent. in passengers, 80 per cent. in mail, but a decrease of 23 per cent. in freight.

Tree Plantation Inspections

The inspectors of tree plantations sent out from the Dominion Forest Survey Station, maintained by the forest service of the Department of the Interior, at Indian Head, Saskatchewan, made 13,035 inspections during the 1919 season.

"Why didn't you receive me on January 1st?"

"I was in my bath when you called."

"No, I am speaking of this year."

Inter-Empire Trade

Report Made In London, England,
To Conference To Be Held At Ottawa

Asked in the British House of Commons about the British government's policy in respect to the subject of Empire reciprocal trade, and the Ottawa economic conference next year, J. H. Thomas, secretary for the Dominions, declared the government was taking further steps to study the problem of closer economic co-operation within the Empire.

Regarding the scope of the Ottawa conference, Mr. Thomas invited the members attending the conference to recommend to the last Imperial conference, dealing with the preparations for the Ottawa conference. This set forth what the conference left over by the Imperial conference will be dealt with at Ottawa, the Ottawa conference would not be limited to such subjects.

Crop Insurance

New Legislation To Be Introduced In the Saskatchewan Legislature

Legislation to empower companies that so desire, to write crop insurance along the line of hull insurance, will be introduced at the coming session of the Saskatchewan legislative assembly.

Announcement to this effect was made by Hon. J. F. Bryant, K.C., minister in charge of the Saskatchewan Department of Agriculture. Crop insurance has been widely discussed by the farmers of the province and has led to the government move.

(By Eva A. Tingey.)

GAY YOUTH

All Tingey models are created and sketched in Paris and the patterns are made in New York.

What is the best way of keeping schoolgirl age not to revel in brilliant colors? "Navy and white."

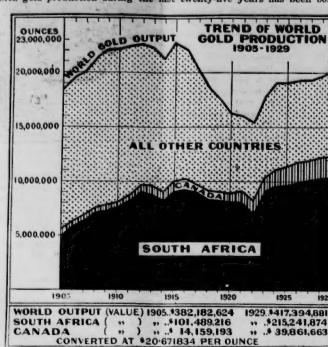

How to keep from cheating the heart of many a bonny lass. It is a most youthful idea to make up in mind and body and attitude at the same time.

Scales with marocain will also assist the blossoming of big game hunters on shooting and mental ability instead of under the present system.

World Gold Production, 1905-1929

Four economic questions are being more keenly discussed throughout the world today than they ever were—of gold and monetary policy. In this respect Canada has a double interest—the interest in a gold-producing country, and also as a trading nation vitally concerned with anything and everything that is fundamental to world prosperity.

While most of the discussion has centred upon the need for better distribution of the world's gold stocks and actual shortage of gold bullion, this anxiety arises from an anticipated early drop in South Africa's output. As the accompanying diagram indicates, the burden of maintaining the level of world gold production during the last twenty-five years has been born in

ever-increasing degree by South Africa. The total gold output of the rest of the world had fallen by nearly 30 per cent. in 1929, in contrast with 1905.

Gold price speculation is in the air, in writing of almost all students of the gold situation, and no importance has been attached to Canada's rising output. It is true that the Dominion's production has never bulked largely in the world's total output, but it has grown, and is continuing to grow, substantially. With gold being produced in large quantities, and in some gold producing firms huge amounts of gold are destined to play a much more prominent part than has yet been foreseen, in offsetting the expected depletion of the South African goldfields and the threatened embarrassment of the world's monetary system.

Fatal Mistakes Of Hunters

Should Be Considered Manslaughter Is Opinion Of Game Commissioner Prosecution on manslaughter charges of all hunters killing humans in mistake for big game in Saskatchewan with the exception of the deer hunt. Commissioner A. E. Etter, commissioner of the game branch of the Department of Railways, Labor and Industries, Regina.

Instructed that this effect was made by the game commissioner following a report of the shooting of Ernest Johnson of Beatty, by Russell Feddersfeld, at Nipawin, on Nov. 28. The game commissioner pointed out that no accusations had been laid against his knowledge charging manslaughter under similar circumstances in any previous case in Saskatchewan this year.

The game commissioner will also advocate the banning of big game hunting on shooting and mental ability instead of under the present system.

St. Lawrence Navigation

Efforts Are Being Made To Lengthen Season For Shipping

Further efforts by the Department of Marine to lengthen the season of shipping on the St. Lawrence, will be made this year, it was stated by Major N. R. McLean, chief engineer of the department. When the ice has thickened to the depth of a foot, the ice breakers will set to work to open a channel and it will be kept open as long as possible, the hope is that by the spring, long before the main body of ice has moved out, this channel will be navigable. Opening of this channel would also tend to relieve the spring flood danger in Montreal and vicinity.

Will Grow More Wheat

Soviet Russia Contemplates Increasing Wheat Acreage

The United States Department of Agriculture has informed Soviet Russia that it can expect an increase of 19 per cent. in her wheat acreage to be seeded next spring above her year's total.

The Soviet agricultural information office at Berlin advised that the present intentions of Russia called for sowing 816,807,600 acres.

The acreage now in Prussia and Germany up to the early part of December was reported as 6.6 per cent. greater than a year ago; but a decrease of 10.2 per cent. was noted in Germany's rice acreage.

Sand which can be used in making borders and amber glass is obtained from the Pacific Coast, but while glass sand is still chiefly imported from Belgium.

Sunday School Lesson

JANUARY 4
THE BIRTH OF JOHN THE BAPTIST

Golden Text: "Thou shalt go before the face of the Lord to make ready His people." Luke 1:76.

Lesson: Luke 1.

Devotional Reading: Luke 1:68-70.

Explanations and Comments

The Preface to Luke's Gospel verses 1-4—Luke himself, who tells us he is a carpenter, who obtained his information from those who were eyewitnesses of the events he records.

The Birth of John the Baptist. For Luke, verse 1-15—When the time came for Zacharias' group to officiate in the temple, he had to go as was customary to determine which priest should offer the incense. "Now there were two priests who had charge of the temple, each serving twice, and the number of priests was so great that many never offered the incense. But it had been the custom of the highest mediatorial act, the most solemn part of the day's service, to be given to the first priest on duty, and the priest who had this privilege was ever afterwards called 'the covetous.' The covetous lot fell to Zacharias."

When Zacharias was in the Holy Place, the people stood without the temple court, praying. The altar of incense was in the Holy Place in front of the curtain, and the door of the Holy of Holies. On its right stood the table of shewbread, and on its left the golden candlestick, with its seven branches, and the lamp which was to burn before the presence of God. Zacharias had chosen, as was the custom, each performed that duty. After the service was over, he removed what had been left on the altar from the service of the evening sacrifice, and then he and his wife spread live coals on the altar and then left. Zacharias was alone. He took a bunch of hyssop and spread the incense on the glowing coals. At that solemn moment, the angel of the Lord appeared unto him.

"Do not smile at me of scruples. God sends the angels, thou must bring the eyes,"—Langridge.

Zacharias was troubled and fearful. "For I am a man of unclean lips, and I dwell in the midst of a people who are evil. And I have seen a son whom he shall bear, John, who will be given to thee as a gift, or God is gracious. Although Zacharias had no doubt, and prayed that it might be so, he did not believe it. It is written to support this that his prayer in the temple at this time had been heard, and the command of the Lord was given to him to name his son John."

Dr. Plummer commented that the name John was given to him because he was a "good boy" and a "good son."

It is manufactured by a Huddersfield firm, commercial vehicle makers.

It is built on the road it resembles an omnibus and runs on rubber tires. In 30 seconds railway carriage trucks can be fitted, and it will travel on the track at 60 miles an hour.

The London, Midland and Scottish Railway Company are co-operating with the firm in the tests.

Novel Type Of Vehicle

Can Run As Omnibus On Rubber Tires Or On Railway Track

A novel type of vehicle adaptable to either road or rail, which is to be tested within the next few weeks near London, England, may revolutionize transport methods.

It is manufactured by a Huddersfield firm, commercial vehicle makers.

Fishing For Tuna

Sport fishing for tuna, the 700-pounder of the ocean, is a favorite sport among the sportsmen of the coast of Nova Scotia has proved a most popular pastime this past year.

John Mayow published the first comprehensive treatise on the atmosphere in 1674.

Royalists Buy B.C. Poultry

Her Imperial Majesty, the Empress of Japan, is the most recent large order for Canadian broiler chickens, having just purchased 100,000 fowls, having highly pedigreed stock from R.O.P. Co-Operative Association of Vancouver to the value of \$4,000.

John Mayow published the first

comprehensive treatise on the atmos-

phere in 1674.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE
THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

USE
WINDOLITE
IN
BROODER
HOUSES
LAYING PENS
DAIRY BARN
SUNROOMS
ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Static Stopped Radio Cooking

Interesting Demonstration By Electric Wizard Pals At Critical Moment

Radio cooking static made its first public appearance in New York recently.

It interfered with popping a bag of corn in the presence of 1,200 diners at a luncheon of the New York Merchants' Association.

Just before the luncheon the radio cookster was working perfectly until a sharp crackle of static was heard.

A test paper sack of corn placed between two jars of ice water to make sure there was no heat in the air, popped perfectly, but the heat generated within the kernels did not.

But at the luncheon in the expectant hub of the audience something went wrong. It was just what might be expected of static. No corn popped.

Frozen Light, one of the queer new discoveries of science, also was exhibited and worked perfectly.

This light was frozen into the surface of a metal screen at Schenectady and brought to New York in a bottle of liquid air at 312 degrees below zero.

The screen, lifted up before the diners, was as black as jet, but was as bright as the sun just now. The light was frozen into the surface of the screen just now.

The screen, lifted up before the diners, was as black as jet, but was as bright as the sun just now.

BOYD NOW PLANS FLIGHT ACROSS THE DOMINION

New York—Canada is keeping pace with world-wide progress in aviation and her future is assured.

This is not the treasured belief of an over-optimistic patriot nor the idle theorist of a dreamer. It is the positive assertion of Canada's conqueror of the Atlantic—Captain J. Erol Boyd—who flew from Newfoundland to England in the three days of last autumn.

Now, in government airports, knowledge in government encouragement of aviation does Canada rank with other nations, says Captain Boyd. She holds the solution to the vexatious problem of proper development of converging points for trans-oceanic flights, both Atlantic and Pacific.

The jovial aviator who piloted the ancient Columbia across the Atlantic with Lieutenant Harry Connor, of the United States, has made his New York debut during the holiday season, but he is hard at work. Plans are being laid for his proposed non-stop flight across Canada. With A. O'Brien, personal friend and adviser, he has packed his bags to travel inland, Captain Boyd, conferring with Giuseppe Bellanca, designer of the veteran Columbus, and hopes soon to return to Canada where he will complete "preparations for the construction of a new craft."

On the average, he will speed of 200 miles per hour as planned by Boyd for his non-stop flight next spring. At first he will make a two-stop journey to establish further what he believes are the sound possibilities of the ocean-to-ocean route. But he is now convinced that with the proper type of "plane, a non-stop flight" is feasible and at the same time a decided incentive to the establishment of regular air routes between the Dominion and States.

The agreement between the two countries solves "the problem that arises as a result of the difficult air routes between the United States and Ontario points." Mail will now reach Eastern Canada from Winnipeg via St. Paul, Detroit and Toronto.

The new flights are expected to begin about February 1. Mail will be transferred from the carrier from and to the airmail which the shipping company receives the contract.

Institution of the new flights is regarded here as a step toward launching a permanent service by Canadian airlines. In this connection, particular significance is attached to the recent amalgamation of aviation companies into the Canadian Air Lines, Limited, while Sir Henry Beauclerc, president of the Canadian National Railways, and E. W. Beatty, C. C., president of the Canadian Pacific Railway, the board of control.

Session To Deal With Radio

Will Take Definite Action On Situation In Canada

Ottawa, Ont.—Definite action will likely be taken at the next session of parliament to deal with the radio situation in Canada. Hon. Alfred Durand, Minister of Marine, whose department has jurisdiction over radio, is giving careful consideration to the question, which is, admittedly pressing.

He will submit his recommendations to the cabinet in which turn will rest the decision as to whether to be adopted.

NEW AIR MAIL LINK THROUGH U. S. ARRANGED

Ottawa, Ont.—With the approval of the government of an arrangement between post office departments of the United States and Canada for a new air mail link between Winnipeg, Minneapolis and St. Paul, plans are being pushed forward for a service that will shorten by two days the time required for mail between the two countries.

A. O'Brien, personal friend and adviser, has packed his bags to travel inland, Captain Boyd, conferring with Giuseppe Bellanca, designer of the veteran Columbus, and hopes soon to return to Canada where he will complete "preparations for the construction of a new craft."

On the average, he will speed of 200 miles per hour as planned by Boyd for his non-stop flight next spring. At first he will make a two-stop journey to establish further what he believes are the sound possibilities of the ocean-to-ocean route. But he is now convinced that with the proper type of "plane, a non-stop flight" is feasible and at the same time a decided incentive to the establishment of regular air routes between the Dominion and States.

The new flights are expected to begin about February 1. Mail will be transferred from the carrier from and to the airmail which the shipping company receives the contract.

Institution of the new flights is regarded here as a step toward launching a permanent service by Canadian airlines. In this connection, particular significance is attached to the recent amalgamation of aviation companies into the Canadian Air Lines, Limited, while Sir Henry Beauclerc, president of the Canadian National Railways, and E. W. Beatty, C. C., president of the Canadian Pacific Railway, the board of control.

Captain Boyd speaks briefly, or more accurately, in aviation. In five years, he believes, Diesel engines will be used in planes of much greater size than we know today. There will be an engine room where attempts can move freely also. Passengers can expect every accommodation they now receive on Pullman trains. In matter of size, Captain Boyd sees the D.O.X as only a forerunner of the aeroplanes of the future.

Boyd's sights across Canada next spring will be set for "dawn-to-dusk" attempt. He plans to take off from Vancouver, flying over Nelson and Fernie in British Columbia. Speeding into Alberta, he will pass over Lethbridge, Medicine Hat, and then into Saskatchewan, he will take his eastward course above Swift Current, Moose Jaw and Regina. Brandon and Winnipeg will see him as he traverses Manitoba. Following the north shore of Lake Manitoba, he will pass Kenora, Nipigon, Sudbury, North Bay and Ottawa. Then—Saint John, his goal. Earlier plans called for stops at Winnipeg and Montreal, but as Boyd now says, "It's going to be Vancouver to Saint John, in one jump, and I hope it ends at Fredericton, in his Los Angeles to New York hop."

For World's Speed Record

Capt. Malcolm May Use Shores Of Great Salt Lake

London, England.—The shores of the Great Salt Lake in Utah may be the scene of Captain Malcolm Campbell's next dash for the world's speed record.

Captain Campbell proposes a trial at Daytona Beach in 1931, and is considering proceeding from there to Utah.

The beach of Utah's salty island sees he believes well suited for speed record trials, for one thing being less exposed to wind and tide.

Song Writer Dies

New York—Charles K. Harris, song writer and music publisher, author of "After the Ball," one of the most popular songs ever written, died at his home here after an illness of three weeks. He was 95.

Senior Naval Officer At Halifax Fron

Toronto, Ont.—Commander V. G.

Brodre, R.C.N., senior naval officer at Halifax, N.S., is proceeding to England on January 2, according to a memorandum issued from the department of national defence. Commander Brodré will serve for some time with the Royal Navy.

Lieut. B. Shadforth, Vancouver division of the Royal Canadian Naval Reserve, is appointed as from Jan. 4 to the naval depot ship H.M.C.S. Na-

den, at Esquimalt, B.C., for 28 days training.

Renew Censorship In India

New Delhi, India.—Lord Irwin, Viceroy of India, has issued instructions to effect a renewal of censorship, with certain changes in the press censorship ordinance and also the "unauthorized news-sheets and news-papers ordinance," both of which has recently expired. The Viceroy also promulgated an ordinance concerning the liabilities for non-payment of taxes.

U.S. Gas Prices Cut

New York—Standard Oil Co. of New York has reduced a cent each in gasoline prices throughout its territory, embracing New York and New England. In New York city the price was reduced one cent a gallon, making the total tax one cents 11.3 cents not including the two-cent state tax. In some parts the cut amounted to two cents and in a few localities to three cents.

"Good Equipment Makes a Good Farmer Better."

Local and General

Happy New Year.

Dr. and Mrs. Freeze spent Christmas in Calgary.

Miss Helen Farmer of Trochu was at her home here for the holidays.

Miss Ella and Don Stephen son were at home for the Christmas holidays.

Mr. and Mrs. J. C. Anderson and family spent Christmas in Calgary and also visited at Okotoks.

Mr. and Mrs. N. M. St. Peter and Master Howard, of Milo, were guests of relatives here for Christmas.

Mr. and Mrs. Dalley, of Priest River, Idaho, were among those who attended the funeral of Arthur Ashmore on Sunday.

Miss Edna Orr, Miss Rheta Campbell and Miss Helen Holm were among the students from Calgary who were home for the holidays.

Mr. and Mrs. Hugh Melville and Miss Ethel Cowell of Leithbridge and Mr. and Mrs. A. Lyons of Barons, were Christmas guests of Mr. and Mrs. R. J. Cowell.

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist 208-8th Ave West, Calgary will make his monthly visit to Champion Friday, January 30, at the Drug Store.

Mrs. A. W. Jopling held a telephone conversation with her mother and sister in Grand Junction, Colorado, on Christmas day. Both parties had no difficulty in hearing everything plainly.

There is one thing that might be called cheerful about the beginning of the New Year and that prices and other conditions are so bad that there can scarcely fail to be an improvement during the coming year.

Mr. and Mrs. Jas. Ashmore and family wish to thank all those who rendered such timely assistance during their recent bereavement and for the tributes of flowers received. Also the B.P.O.E. for flowers sent to the hospital during Arthur's illness.

According to Premier Anderson Saskatchewan will solve its difficulty by the adoption of diversified farming. Saskatchewan has large areas, where wheat can be grown successfully. Where diversification is practicable it has always been safest method of farming.

Don't forget, everyone hand suggestions for a high school yell to Alan McLean before next meeting. Don't leave it to the executive.

The Big Game were very successful in their attempt to provide amusement for the children. A large crowd attended and young and old alike had a very enjoyable time.

Xmas Tree-Concert At Sanderson

The annual Christmas concert and Christmas tree at Sanderson school was a splendid success. Judging by the large crowd that attended Sanderson needs a community hall. Great praise is due to Miss Johansson the teacher for her success in training the pupils who performed their different parts so perfectly, also the committee that handled the funds and helped to make such a joyful evening for old and young. After disposing of the program and presents for children of the whole community, supper was served, and the evening was rounded off by a dance, music as usual being supplied by the Fraser orchestra.

Mrs. Tom Sanderson and son, accompanied by Miss Poland, left for Michel, B.C., to spend part of the holidays with the former's parents.

Mr. and Mrs. Frank Johnson and Irwin Scott, were visiting with old friends during the week.

Mrs. D. Scott and Irwin Scott were driven to Bassano by Royal Ruggles on Dec. 29th, where Mrs. Scott is having her throat treated and Irwin will have his tonsils removed.

Mrs. Herbert Rhodes is reported to be in Vancouver in order to regain her health. She was accompanied by Mr. Rhodes.

Mr. and Mrs. John Anderson and family left on the morning of Dec. 24th by car for Calgary, to spend the evening there, returning in the morning to Okotoks accompanied by Mr. and Mrs. Nels Anderson, to spend

Champion Consolidated School District No. 40

Annual Meeting

The annual meeting of the ratifying of the above school district will be held in the Public School building on Saturday, January 10th, 1931, at 1.30 o'clock, for the transaction of business as required by the School Act.

G. M. CAMPBELL, Chairman School Board.

Donald Bond was home from Calgary to spend Christmas with his parents.

Miss Aileen McCullough was at her home here for the holidays.

Mrs. Marion Gardner, who has been attending school at Blairmore, returned home for Christmas.

Among welcome holiday visitors were Frank Johnson of Arrowood and W. W. Sloan of Queenstown.

Tourist Business

Estimates of the expenditures made in the Dominion by tourists from other countries run back as far as 1920, and it will be found that during this ten-year period, 1920-29, inclusive, tourists from abroad are estimated to have spent in Canada a total of, roundly \$1,682,000,000.

Some Light Stuff

"Did you have your hair cut?"
"No, I just had my cars moved down half an inch."

Famous Scottish road signs: "Tutor—Toll Bridge Ahead."

She: "Why do you call your car 'Clipper'?"
He: "Streamline body, swell paint job, quick pickup, all kinds of speed, keeps me broke, warms up quick and is always ready to go."

"Are kings and queens always good, daddy?" asked the small daughter, looking up from her fairy book.

"They are not," snorted the practical parent, deep in the sport page. "Nine times out of ten, you'll find three out against them."

The minister called at the Jones home one Sunday and little Willie answered the bell.

"He's ain't home," he announced.

"He went over to the golf club."

The minister's brow darkened and Willie hastened to explain:

"Oh, he ain't gonna play any golf. Not on Sunday. He just went over for a few drinks and a little poker." —Régina Star.
